

Precision tracking, simplified.

Who is
AutoTime?

Precision time and labor tracking built for the Aerospace and Defense Contractor

AutoTime is the DCAA-compliant timekeeping platform trusted by the largest government contractors in the country—purpose-built for time and attendance tracking, labor allocation, and audit defensibility that cost-reimbursable federal contracts demand.

Most timekeeping tools were built for HR. **AutoTime was built for GovCon.** Every workflow, control, and integration is designed around the requirements DCAA actually tests — daily entry, supervisor certification, charge code accuracy, real-time visibility, and a defensible audit trail. The result: a system DCAA recognizes as adequate, and a workforce that can pass a floor check on any given day.

WHO IT'S BUILT FOR

Government contractors with **manufacturers with distributed workforces, complex attendance rules, and the need for detailed labor tracking** — aerospace and defense primes, mid-market suppliers, and high-growth defense tech firms — along with their HR, Finance, and Operations leaders.

WHAT AUTOTIME DOES

DCAA-Compliant Timekeeping

Daily entry enforcement, supervisor certification workflows, and a full audit trail — engineered around the DCAA system adequacy criteria.

Real-Time Labor Visibility

See labor actuals vs. planned budget the moment time is recorded — by contract, CLIN, project, and workforce category.

Floor Check Readiness

Alive compliance dashboard shows timesheet status, delinquencies, and certifications across your entire workforce — instant audit readiness.

Subcontractor Portal

Subs submit time against your charge code structure with the same daily entry, certification, and audit trail as your prime employees.

ERP & HRIS Integration

Bidirectional sync with Oracle, SAP, and leading HRIS & ERP platforms — no manual exports, no reconciliation lag.

Mobile & Field-Ready

Field teams, remote workers, and traveling staff capture compliant time anywhere — with the same controls as desk-based employees.

BUILT FOR THREE LEADERS

HR LEADERS

HR compliance without spreadsheets. Training records, classification accuracy, and policy enforcement — all tied to one audit-ready system.

FINANCE LEADERS

Protect your rates and your revenue. Clean labor data, defensible cost allocation, and a system DCAA recognizes as adequate by design.

OPERATIONS LEADERS

Run tight programs with live labor data. Floor check readiness, real-time burn visibility, and full subcontractor coverage in one place.
